КОДЫ 7- и 8-БИТНЫЕ, ПРЕДСТАВЛЯЕМЫЕ НА ПЕРФОКАРТАХ

Information processing systems, 7-bit and 8-bit codes represented on punched cards

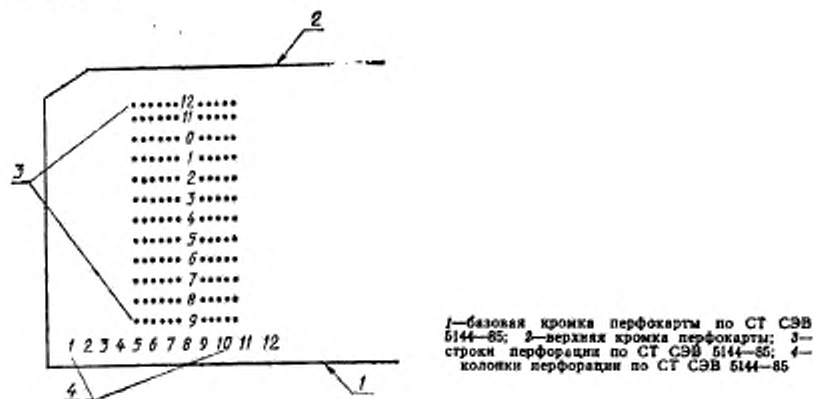

ГОСТ
27464-87
(СТ СЭВ 357-86)

ОКСТУ 4002

Дата введения 01.01.88

Настоящий стандарт устанавливает представление 7-битного кода КОИ-7 по ГОСТ 27463-87 и 8-битного кода КОИ-8 по ГОСТ 19768-74 на 12-позиционных перфокартах (КПК-12) по СТ СЭВ 5144-85, применяемых в устройствах подготовки и ввода-вывода данных на перфокартах.

1. Комбинации битов 7- или 8-битного кода присваивается одна комбинация перфорации, занимающая на перфокарте одну колонку. Каждая колонка перфокарты имеет 12 позиций для перфорации согласно черт. 1.

Черт. 1

2. Каждая колонка перфокарты должна перфорируваться по следующим правилам:

1) в позициях 12, 11, 0, 9, 8 допускается перфорация отверстий в любой комбинации, при этом общее количество комбинаций составляет $32 (2^5)$;

2) в позициях 1, 2, 3, 4, 5, 6 и 7 допускается перфорация только одного отверстия или отсутствие перфорации, при этом общее количество комбинаций составляет 8.

Общее количество комбинаций в колонке составляет $256 (32 \times 8)$.

3. Код КПК-12 должен определяться таблицей преобразования кодов КОИ-8/КПК-12 (см. черт. 2), которая дает однозначное соответствие комбинации битов кода КОИ-8 с комбинациями перфорации на перфокарте.

Структура таблицы черт. 2 соответствует структуре кодовой таблицы КОИ-8.

Каждая позиция кодовой таблицы черт. 2 содержит комбинацию пробивок на перфокарте в виде последовательности номеров позиций.

4. Представленные в пределах левой половины таблицы перевода кодов КОИ-8/КПК-12 (колонки с 00 по 07) комбинации пробивок определяют 128 комбинаций кода КОИ-7 (старший по значимости восьмой бит 68 отсутствует).

5. Таблицы перевода кодов ДКОИ/КПК-12, КПК-12/КОИ-8; КПК-12/ДКОИ приведены в приложении.
